

Calculator:

As this course is designed to teach mathematical techniques, you will need a calculator that can perform basic mathematical functions. These include exponentials, logarithms, radicals and factorials (\log , \ln , e^x , $\sqrt[n]{x}$ and $x!$). Any basic scientific calculator will perform these functions. While a graphing calculator may be useful in doing some of the homework problems, you cannot use a graphing calculator on the exam.

Grading:

Grades will be determined on the basis of your performance on 11 quizzes, 2 midterms, and a cumulative final exam. Quizzes will be given on Wednesday. It can be either 15-20-minutes in class group/in

Tentative Course Schedule and course outline:

This schedule is subject to change if necessary. Any scheduling will be announced in class and posted on the class webpage.
